

Programme	: B.Tech (CSE and its Specialization)	Semester	: Winter 2023-24
Course	: Web Programming Lab	Code	: BCSE203E
Faculty	: Dr S. Rajkumar		

IPS-2

1. (a). Develop the following web page to understand and explore the basic elements in **HTML**.

Note:

- (1) Do not use any properties from other technologies such as CSS, javascript etc..Use only HTML.
- (2) Provide a hyperlink to the image mentioned in the figure.
- (3) The text "Line Breaks" is a flying text from right to left
- (4) Font style of the paragraph 1 is the courier
- (5) The starting and ending point of the first paragraph must be the same vertical orientation
- (6) Use 3 blank spaces in the paragraph starting with the words "If you want to put multiple spaces"
- (7) Use super-script, sub-script, highlight and emphasize features at the appropriate place as used in the below figure.
- (8) The starting and ending point of the first paragraph must be the same vertical orientation
- (9) Use appropriate entities or the character references in the paragraph message and wherever it is mentioned.
- (10) Use pre-formatting tag to create the paragraph which starts with the words "Most HTML commands"

- (b) Add a video control in the above web page using HTML5.
- (c) Refresh the above web page automatically for once in 5 seconds.

(2) Design the below table using HTML:

Here is the table caption

 <h1 style="text-align: center;">XML</h1> <h2 style="text-align: center;">Approximation</h2>				
	# of languages	Regions	what?	How are you?
First Country	2	india	Nothing	Fine
Second Country	1	United states of America
